

Apple TV

What Is Apple TV?

- Apple TV is not a physical television set!
 - Apple TV is a separate entertainment device that you can hook up to your existing TV to stream or purchase content such as videos, photos, and music.
 - Apple TV allows you to purchase content through the iTunes Store or wirelessly send your content already purchased on your iDevice to your TV.
- 

What Can It Do?

▶ Music

- Stream your music on your iDevice wirelessly
- Listen to iTunes Radio

▶ Videos

- Stream your videos on your iDevice wirelessly
- Purchase or Rent movies and TV shows from the iTunes Store.
- Watch videos from YouTube, Netflix, Hulu, and many more!

▶ Photos

- Stream your photos on your iDevice wirelessly
- View photos from your iCloud Photo Stream
- View Photos from Flickr

What Do I Need?

- Apple TV
- Television with an HDMI input
- Internet connection
- **THAT'S IT!**

AirPlay

- ▶ AirPlay is what you use to stream your content on your device to the Apple TV
- ▶ AirPlay is a piece of software that is included on almost all Apple devices!
- ▶ The AirPlay symbol will automatically appear across your device when an Apple TV is discovered on your network.
